

THE EQUINOX FAMILY

Conceived by you, designed by Vantage and delivered by a professional team of trained and supported installers, Equinox is a family of unique user interfaces positioned to deliver the ultimate in simplification for everyone. Growing and adapting to the ever changing needs of the home, Equinox allow users to simply update their preferences on the fly. Step up and play, discover more, and personalize Equinox through gesture, tap, or swipe. When you're ready to return to the home screen, push the tactile 'Home' button and be there in an instant. Enjoy stability with Equinox's system consolidation around a single user interface. The Equinox family's graphically consistent environment provides a uniform experience with your mobile world and carries more power than you could ever imagine!

Equinox 40 ▼

Much more flexible than a standard keypad yet carrying the same footprint and two wire connection, Equinox 40 combines a simple view of lighting, comfort, and shading. There are two additional pages for further control, revealed by gesturing left or right. Its full glass screen automatically adjusts to the lit space and 'sleeps' during inactive time.

Equinox 41 ▼

Equinox 41 delivers the ultimate simplified touchscreen design and editability, compact enough to fit in a single gang box. Access all the Vantage widgets through gesture. The Equinox 41 enables users to create personalized profiles for a unique experience from user to user. This includes dashboard and full screen personalization. Each user has the ability to see her favorite widgets, enabling her to access what is most important.

Equinox 73 ▼

Equinox 73 delivers the ultimate simplified touchscreen design and on screen editability. Access all the Vantage widgets, three at a time, or enter full screen mode to enjoy the convenience of Equinox 73's large screen. The Equinox 73 enables users to adapt the user interface to the changing space along with evolving needs and growth. It's like having multiple iPads in a single device, always on and ready to use.

Equinox Mobile Apps ▼

The vehicle for absolute consistency for your mobile world, Vantage brings your Apple or Android devices to the integrated Equinox world so whether you are on the go or roaming around the home, you have constant access and control.

WIDGETS

A widget is a software application, such as lighting or scene control, embedded in Equinox. Through natural gestures like swipe, flick, or scroll, widgets allow for intuitive system navigation and control. Widgets empower users to personalize the system to their changing environment, even for complex requirements.

With its full widget-based platform, the Equinox family delivers a rich animated experience, providing the user with simple convenient control of lighting, scenes, weather, climate, shades, and timers.

Each widget enables you to manage one aspect of your environment

Lighting

Control personalized lighting scenarios at the touch of a button

Scenes

Turn on the fireplace, adjust the shades, and dim the lights together with one button

Climate

Save money and energy by scheduling your thermostat to be optimally efficient, or modify the local temperature

Weather

Quickly check the weather with a changing display that reflects current temperature and conditions

Shades

Use this widget to set the shades to open gradually in the morning as you wake up or close all at once when you leave the house

Timers

View or edit all scheduled events, or simply bypass them entirely
