VANTAGE iPad APP

Transform your iPad into a fully mobile touchscreen for Vantage home entertainment and lighting systems. By connecting via Wi-Fi or via the 3G network, you can set lighting levels, whole-home scenes and room temperatures or adjust volume and view surveillance camera feeds for multiple locations in real time. Simply download the app from the iTunes store, install it on your iPad and have your dealer connect the app to your network so it can read the Vantage system information. This method gives you complete control as it requires no further development or design work by the dealer or installer. Easily choose which keypads, lights, scenes, audio zones, video zones, AV sources and thermostats you wish to control and the command of the home is yours. By combining your most used actions into a favorites screen, the convenience you love with Vantage is ready to go with you anytime, anywhere.

Groovin'.

Everyone gets to groove to their favorites. Listen to mom's top artists in the kitchen, dad's playlist on the deck and the kids' newest albums out by the pool. Give guests access to thousands of Internet radio stations or even their iPod in the guest suite.

See the Light.

Browse through all the rooms of your home and see what's on at a glance. Activate "Home", "Away", "Vacation" and "Party" modes or set individual lights to just the right level for your mood.

The Comfort Zone.

Get comfortable and adjust the temperature for any climate area in your home with the flick of a finger. Heat, cool and set modes from the family room couch or while traveling check to make sure the thermostats are all set back.
